

Amirkian Kiani

Senior Software Engineer

Tehran, Iran ✉ great.kian2001@gmail.com ☎ (+98) 9921267228 🔗 linkedin.com/in/amirkian-kiani 🌐 amirkiankiani.ir

Summary

Senior software engineer with 7+ years of professional Python backend experience and 10+ years of programming experience across automation platforms, AI-enabled products, ERP systems, media platforms, and scalable APIs. Strong background translating business processes into production software using Python, Django/DRF, FastAPI, Odoo, Go, Node.js, PostgreSQL, Redis, Celery, Docker, Kubernetes, and CI/CD. Experienced with LLM assistants, contextual Q&A, RAG-style retrieval patterns, prompt workflows, summarization, transcription/captioning pipelines, and internal workflow automation. Known for technical ownership, clean architecture, developer mentoring, and collaboration with business and engineering stakeholders.

Targeted Skills

Automation & AI Platforms: ERP automation, workflow automation, LLM integrations, RAG/retrieval-based assistants, prompt engineering, LlamaIndex, n8n, MCP concepts, AI-assisted development workflows, OpenAI APIs

Backend & Full Stack: Python, JavaScript, Go, Django, Django REST Framework, FastAPI, Odoo, Node.js, Express.js, NestJS, Next.js, Gin, REST APIs, microservices, ReactJS, React Native, Flutter, SwiftUI

Data & Infrastructure: PostgreSQL, MariaDB, Redis, Celery, Elasticsearch, Pinecone, pgvector, asynchronous processing, event-driven workflows, Docker, Kubernetes, Nginx, CI/CD, Git, Linux, FFmpeg

Leadership: Technical ownership, architecture review, mentoring, code review, documentation, stakeholder collaboration, developer enablement

Experience

Senior Software Engineer – Faraatar Entrepreneurship Group

Oct 2024 – Present

Tehran, Iran

- Design and implement Odoo-based ERP and internal platforms across HR, Accounting, Payments, CRM, Project Management, and client-specific workflows.
- Translate business, accounting, tax, and operational requirements into scalable Python, PostgreSQL, and Docker-based automation services.
- Build REST APIs, IAP services, and microservices that extend Odoo and integrate ERP workflows with payment, messaging, and third-party platforms.
- Automate customer engagement and operational communication through WhatsApp, SMS, and multi-channel notification workflows connected to CRM and marketing processes.
- Improve reliability through CI/CD pipelines, containerized deployments, performance tuning, code reviews, and architecture guidance for engineers and ERP teams.

Freelance Software Engineer – Freelancer

Oct 2023 – Jul 2024

Tehran, Iran

- Delivered backend and integration solutions for video processing, media delivery, and travel-ticketing platforms using Go (Gin), Python, Django/DRF, PostgreSQL, Docker, and CI/CD.
- Designed REST APIs and service boundaries for booking, payment processing, authentication, identity-provider integration, media conversion, and client workflows.
- Built scalable microservices for real-time video streaming, conversion, and editing, optimizing processing reliability and API performance under commercial workloads.
- Worked directly with stakeholders to clarify business processes, identify automation opportunities, and convert requirements into maintainable services.

Python/Django Mentor – Maktab Sharif & Quera

Aug 2023 – Jun 2024

Tehran, Iran

- Mentored learners in Python, Django, API design, debugging, architecture, clean code, optimization, and production-oriented backend practices.
- Created exercises and mini-projects covering REST APIs, database modeling, asynchronous tasks, and software engineering fundamentals.
- Improved curriculum content with instructors to align training with modern engineering practices, emerging technologies, and developer productivity habits.

Senior Backend Developer – Azadfekri School

Sep 2022 – Sep 2023

Tehran, Iran

- Architected an AI-enabled social media platform supporting video, audio, text posts, comments, live discussions, and content-based interactions.
- Integrated LLM assistants and fine-tuned chatbots to summarize user sessions and provide contextual Q&A over shared content and platform conversations.
- Implemented media intelligence pipelines for transcription, caption generation, summarization, and recommendations using machine learning and language-model workflows.
- Designed scalable REST APIs and microservices with Kubernetes deployments, improving availability, resource utilization, and maintainability.
- Led CI/CD, deployment automation, production reliability improvements, and backend performance optimization under heavy user load.

Technical Backend Developer Expert – Golden Key

Sep 2021 – Sep 2022

Tehran, Iran

- Developed backend systems for large-scale B2B products used by major clients including Digikala, Namava, Irancell, MCI, and Soroush+.
- Built and optimized REST APIs for HTML games, video streaming, music, podcast, and audiobook platforms serving high-traffic enterprise integrations.
- Reduced response times across Golden Key projects from 15–20 seconds to 2–6 seconds through query tuning, caching, Redis/Celery background processing, and code-level optimization.
- Collaborated with business, frontend, and product teams to deliver reliable media platforms with strong integration needs.

Python Backend Developer – Codenegar

Apr 2021 – Aug 2021

Tehran, Iran

- Designed backend systems for an e-commerce platform and a creator monetization product supporting donations, subscriptions, and digital content sharing.
- Built REST APIs, database schemas, and integration flows while partnering with frontend and DevOps teams to improve scalability, stability, and secure delivery.

Python Backend Intern – Richedu

Dec 2020 – Mar 2021

Vancouver, Canada

- Contributed to a Django-based Learning Management System with an international team, implementing backend features for data handling and user management.
- Assisted with testing, refactoring, documentation, and quality assurance to improve maintainability across a distributed engineering workflow.

Selected Projects

- **OdooPro** – *odooopro.ir*: Faraatar's main Odoo project, focused on ERP implementation, Odoo module development, workflow automation, integrations, customization, and deployment services.
- **Azad** – *azad.im*: AI-powered social platform with LLM summarization, contextual Q&A, transcription, captioning, and recommendation workflows.
- **Gardima** – *gardima.ir*: Travel booking platform built with Go (Gin) and React Native for plane, train, bus, and hotel reservations; developed ticketing, payment, and booking services.
- **Baazigooshi** – *baazigooshi.com*: B2B web gaming platform serving 3+ million users and delivered for partners including Namava, Digikala, and Zarebin; built content management, analytics, and integration services.
- **Converter API** – *media conversion platform*: Go-based video/audio processing API for transcoding, editing, playback, and integration workflows.
- **iTunes / Chaargoosh / Videaneh** – *media platforms*: Backend services for streaming, subscriptions, purchases, encoding, content management, secure delivery, and high-volume media access.
- **Iqbal Forum** – *iqbalforum.org*: Django and ReactJS news platform with content management, multilingual support, and responsive user experience.

Education & Certifications

Master of Software Engineering – Islamic Azad University, North Tehran Branch, Tehran, Iran

Thesis phase (final stage)

Bachelor of Computer Engineering – Quchan University of Technology, Quchan, Iran

2024

TOEFL iBT – Total 109 (Reading 29, Listening 28, Speaking 26, Writing 26)

Managerial Functions of Leadership, Finance, Marketing – Upkey

May 2021

Linux 0-Z – Quera College

2020
